TABLE OF CONTENTS

SPECIFICATIONS

FORMAT:
EURORACK

DIMENSIONS:
4HP, 30mm deep

INTERNAL AND EXTERNAL SIGNALS (3.5mm jacks):
0-5V Logic I/O

MAX CURRENT:
+12V: 21mA
-12V: 19mA
+5V: n/a

INSTALLATION

Remove module from packaging.

Power down your modular synthesizer and disconnect the power cable from the wall outlet.

Attach the included power cable to the module's power connector and connect the other end to the power distribution bus in your EuroRack synthesizer case. Match the red stripe of the cable to the solid white line on back of your unit.

Position the module on the mounting rails in your EuroRack case and screw down mounting screws. Power up! If your case does not turn on properly then you have installed the module incorrectly. Simply power down and make sure to follow the diagram when reconnecting the module.
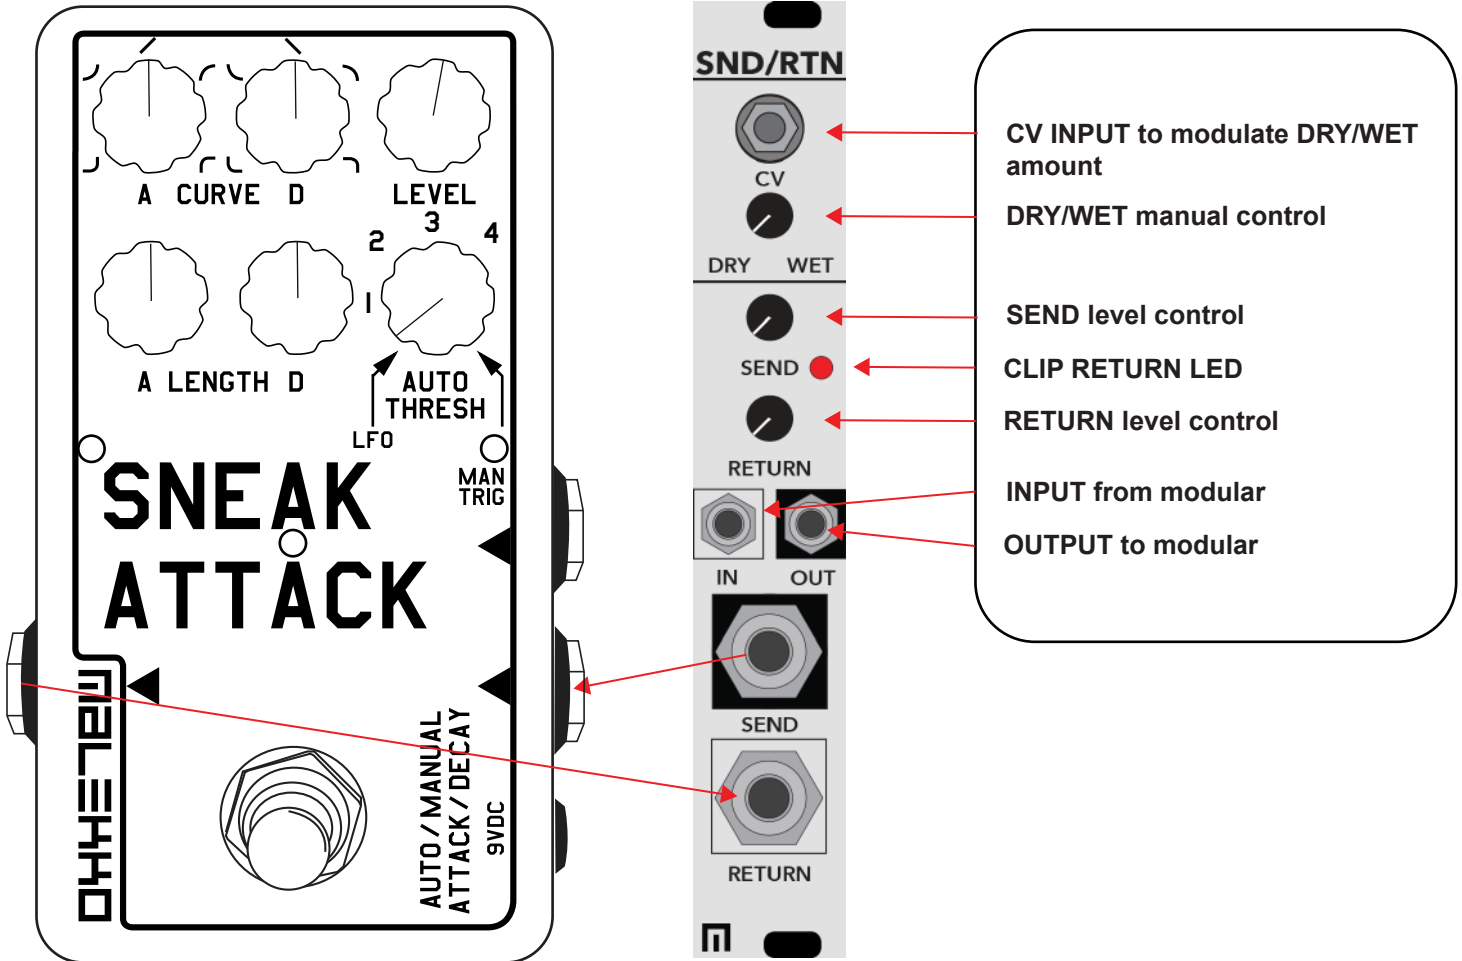

RED STRIPE TO SOLID WHITE LINE

DESCRIPTION

The SND/RTN module includes ¼ jacks for instrument and line level input with CV input to modulate the dry/wet mix as well as manual control over send and return levels (and a clip LED). Marry Malekko pedals and other outboard effects with your modular in 4hp.
